Aquastatin d.o.o. je specijalizovana kompanija sa sedištem u Beogradu, Srbija, koja se niz godina intenzivno bavi istraživanjima, razvojem, proizvodnjom i primenom sredstava namenjenih mnogim industrijama i očuvanju životne sredine i sprečavanju ekoloških udesa. Kao proizvod dugogodišnjeg rada sa proverenim timom stručnjaka kreirali smo prilagođena rešenja za različite industrijske grane i razvili više grupa sredstava za protivpožarnu zaštitu, kontrolu prašine i sprečavanje formiranja leda od kojih izdvajamo:

AQUASTATIN AF 20 – požari klase A

AQUASTATIN AD 15-40 – sredstva za subijanje različitih vrsta industrijske prašine bez obzira na stepen njihove kvašljivosti;

AQUASTATIN Ice Melt – za sprečavanje formiranja leda na putevima i pešačkim stazama u zimskim uslovima.

AQUASTATIN AFSuperior– požari klase B, C, D

Aquastatin d.o.o. is a specialized company based in Belgrade, Serbia, 8 Radojke Lakic Street, which for many years has been devoted to the research, development, production and application of funds for many industries, environmental protection and the prevention of environmental accidents. As a result of many years of working with experienced team of professionals, we have created customized solutions for various industrial branches and we have developed numerous groups of products for fire protection, dust control and ice formation prevention.

The emphasis is on the following:

AQUASTATIN AF 20 - fire class "A"

AQUASTATIN AD 15-40 – a product for suppressing various types of industrial dust,

AQUASTATIN Ice Melt – prevention of ice formation on roads and pedestrian walkways in winter conditions.

AQUASTATIN AFSuperior - fire class B, C, D
